

NAGENDRA LANKALAPALLI

Java Backend Engineer | Banking, Payments & BFSI | Microservices

Mobile: +91 88975 90280 | Email: lvvnagendra99@gmail.com | Hyderabad, India (Open to Relocation / Hybrid)

LinkedIn: <https://www.linkedin.com/in/nagendra-lankalapalli-6a7457236>

PROFESSIONAL SUMMARY

Results-driven **Java backend engineer** with 4+ years in product-led and enterprise delivery across **Banking, BFSI, FinTech, and SaaS**. Currently contributing to high-volume transaction processing and payment services on Intellect Design Arena's **Payment Service Hub (PSH)** in support of **CIBC**. Proficient across **Java 8–17**, the **Spring ecosystem** (Boot, Security, Cloud), **REST APIs**, **Apache Kafka**, **Redis**, **PostgreSQL**, **OAuth2/JWT**, containerized CI/CD, and **AWS**. Demonstrated outcomes: lower API latency (~40%), stronger platform availability (toward 99.9%), multi-gateway payment integrations, and faster, safer releases. Comfortable partnering with product, QA, and architects in **Agile/Scrum**.

CORE STRENGTHS

Cross-functional collaboration | Written communication (API docs) | **End-to-end ownership** | **Stakeholder alignment** | Adaptability in fast-paced sprints

TECHNICAL SKILLS

Languages & Core: Java (8–17), J2EE, SQL, OOP, design patterns

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate/JPA

Architecture: Microservices, REST, event-driven design, WebSockets

Messaging: Apache Kafka, ActiveMQ

Data: PostgreSQL, MySQL, MongoDB, Redis, query tuning, read replicas

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, CI/CD, Maven, Git, GitHub, Apache Tomcat, NGINX

Security & APIs: OAuth2, JWT, SSL/TLS, Keycloak (SSO), Swagger/OpenAPI, payment gateway integration

Practices: Agile, Scrum, SDLC, Log4j2

PROFESSIONAL EXPERIENCE

Product Engineer | Intellect Design Arena

Apr 2025 – Present

CIBC — Payment Service Hub (PSH) | Enterprise banking, payment processing, transaction systems

- Integrated and extended Intellect's Payment Service Hub (PSH) within **CIBC's** banking program, coordinating with client and internal stakeholders and aligning delivery with security, audit, and compliance expectations typical of regulated financial services.
- **Delivered PSH capabilities end to end**—requirements, technical design, implementation, testing, and deployment support in the client environment—including extensions for bank-specific workflows and integration points.
- Engineered and maintained modules for a high-throughput transaction processing stack; prioritized data integrity, security controls, and steady performance under peak load.
- Built financial workflow capabilities using Spring Boot microservices; partnered with architects, QA, and product owners in two-week Agile cycles.

- Integrated Kafka, ActiveMQ, and WebSockets for asynchronous and real-time channels; persisted state in PostgreSQL alongside internal banking frameworks (e.g., APRON).
- **PSH platform:** enterprise BFSI payments stack (Java 17, Spring, Angular, PostgreSQL, Kafka, ActiveMQ, WebSockets, APRON).

Java Developer | Beauto Systems

Jul 2022 – Mar 2025

SaaS and enterprise backends — integrations, reliability, secure releases

- **Reduced API response times by ~40%** via Redis-backed caching and targeted service optimizations.
- Improved operational stability toward 99.9% uptime through resilient schema design, monitoring-minded practices, and disciplined rollouts.
- Onboarded payment gateways (**M-Pesa, Stripe, Paystack**) and contributed to higher end-to-end transaction success rates.
- Strengthened authentication and authorization with OAuth2 and JWT; supported reduction in unauthorized access attempts.
- Automated release paths with containerized **CI/CD** (~50% faster deployments); standardized Swagger/OpenAPI contracts for faster onboarding.
- Delivered features across SaaS, IoT, and internal enterprise modules using Kafka, PostgreSQL, and AWS.

KEY PROJECTS (Beauto Systems)

- Nexus of Agri (NoA) — SaaS: React, Spring, PostgreSQL, Kafka, WebSockets, OAuth2, AWS; 100K+ users; read replicas; ~35% query latency reduction; payments.
- IIOTCONN — Industrial IoT: Java 17, Spring Cloud, Kafka, PostgreSQL, Redis, Spring Security, Swagger 3, Log4j2.
- OnePlatform — Enterprise: Spring Boot, React, Android, PostgreSQL, Keycloak SSO, Docker, AWS.

EDUCATION

B.Tech, Computer Science — Kakinada Institute of Engineering Technology (KIET), 2022

Intermediate (MPC) — Sri Ravi Junior College, 2018

SSC — ZPP High School, G. Vemavaram, 2016

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
